

(a2) examining files associated with the on-line site over the Internet to produce current site information; and

(a3) determining the change value based on the current site information and previous site information associated with the prior registration of the on-line site.

3. A computer implemented method as recited in claim 2, wherein the on-line site is a website on the Internet.

4. (Currently Amended) A computer implemented method as recited in claim 1, wherein the prior registration is a copyright registration with the U.S. copyright office.

Sub C27

B1

5. A computer implemented method as recited in claim 1, wherein the on-line site is identified by a Universal Resource Locator.

6. (Currently Amended) A computer-implemented method for monitoring content of a website, said method comprising:

identifying an address location for the website;

periodically crawling the address location for the website to determine an amount or degree of content change at the website as compared to a prior state of the website; and

determining that a registration is needed for the website when the amount or degree of content change exceeds a predetermined threshold, the registration being with a governmental entity.

7. A computer implemented method as recited in claim 6, wherein said method further comprises:  
providing a notification to a contact for the website when it is determined that a registration is needed for the website.

8. A computer implemented method as recited in claim 7, wherein the notification is an email notification automatically sent to the contact when it is determined that a registration is needed for the website.

9. A computer implemented method as recited in claim 8, wherein the email notification provides information on the amount of content change and a recommendation for a registration.

10. A computer implemented method as recited in claim 9, wherein the email notification further provides an indication of where the content change occurs within the website.

11. A computer implemented method as recited in claim 6, wherein said method further comprises:  
registering of the website when it is determined that a registration is needed for the website.

12. A computer implemented method as recited in claim 11, wherein said registering of the website is an on-line registration of the website.

13. (Currently Amended) A computer implemented method as recited in claim 6, wherein the website is previously registered with a governmental entity, and the prior state of the website is associated with the previous registration, and

wherein the registration determined to be needed is a subsequent registration for the website, the subsequent registration being subsequent to the previous registration, and the subsequent registration being associated with a subsequent state of the website.

14. A computer implemented method as recited in claim 13, wherein said method further comprises:

providing a notification to a contact for the website when it is determined that a subsequent registration is needed for the website.

15. A computer implemented method as recited in claim 14, wherein the notification is an email notification automatically sent to the contact when it is determined that a subsequent registration is needed for the website.

16. A computer implemented method as recited in claim 13, wherein said method further comprises:

on-line registering of the website when it is determined that a subsequent registration is needed for the website.

17. A computer implemented method as recited in claim 16, wherein the on-line registration references the previous registration.

18. A computer implemented method as recited in claim 6, wherein said periodically crawling the address location for the website only considers selective pages of the website and compares such corresponding pages of the prior state of the website to determine an amount of content change at the website.

31  
19. (Currently Amended) A computer implemented method for determining whether a copyright registration update is needed, said method comprising:

comparing at least a portion of a website against a corresponding portion of an earlier stored version of the website that was previously subject to a copyright registration with a governmental entity to produce a change indication; and

determining that the copyright registration update is needed for the website based on the change indication.

20. (Previously Amended) A computer implemented method as recited in claim 19, wherein said method further comprises:

providing a notification to a contact for the website when it is determined that a registration is needed for the website.

21. (Previously Amended) A method as recited in claim 20, wherein the copyright registration is with the U.S. copyright office.
